Legal Notices

The content is protected by copyright and trademark laws. Except for fair use for private study, research, critical review, or analysis as permitted by copyright law, no part may be reproduced or reused for commercial purposes of any kind without the prior written consent of the copyright holder. All trademarks, logos, and other marks illustrated are the property of their respective owners.

1. Delivery Content

1.1. Documentation

The delivered documentation includes :

- The present note.
- Software documentation modified in relation to new features.
- The specification document related to new features.
- A user manual

1.2. Material

As with version 1.1, you only need to launch the executable; the material generates automatically, and the software will start directly.

2. Corrections

No corrections.

3. Evolutions

3.1. Interface and CryptoSoft

3.1.1. Description

New interface, **the user now has a graphical interface!** Gone is the all-dark console.

Security: an encryption software will be integrated into the application, allowing the user to encrypt their files during execution.

The user can now save their own settings for the language, log type, and state (as for V1.1.0) but also the files to be encrypted.

Blocking the execution of the application if the business software is open.

3.1.2. Impact on Settings

None.

3.1.3. Impact on Integration

None.
